

Translation of the pertinent portions of a response by KBA,  
dtd. 07/28/2005

**RESPONSIVE TO THE NOTIFICATION OF 06/13/2005  
CHANGES UNDER ART. 34 PCT ARE BEING FILED**

1. The following are being filed:

1.1 Claims

(Replacement pages 33 to 36, version of  
07/28/2005)

1.1.1 Original claims 1 to 14.

Original claims 1 to 14 remain unchanged.

1.1.2 New claim 15

New claim 15 is formed from characteristics of  
original claims 15 and 16.

1.1.3 New claims 16 to 23

Original claims 17 to 24 were renumbered as new  
claims 16 to 23 and their dependencies were changed.

1.2 Preamble of the Specification

(Replacement pages 1 and 2, version of 07/28/2005)

The title was changed to "Rollers of an Inking or  
Dampening System, as well as an Inking or Dampening System  
with two Rollers acting together in the Print-on Position".  
The third paragraph on page 1 and the fifth paragraph on page  
2 of the preamble of the specification were matched  
accordingly.

The expression "of claim 1, 6 or 15" or "of claim 1, 6  
or 15" was changed to "of claim 1 or 6 or 15".

2. Miscellany

2.1 Re. Claim 1:

The object is, for example, to provide a cost-effective  
and simple solution for the rotatory driving of a roller  
which can traverse. An otherwise customary step providing a  
gear which absorbs a relative movement between a stationary  
motor and stationary roller, or the employment of an

expensive special motor from D1, can be omitted with the claimed solution. In D1 the stator is fixed on the frame and the rotor is designed to be axially movable.

2.2 Re. Claim 6:

The object here also is, for example, to provide a cost-effective solution for the rotatory drive. In connection with the solution in accordance with claim 6, the axial lift is absorbed within the roller and not in the motor, as probably in D2.

2.3 Re. Claim 15:

In the solution in accordance with new claim 15, an arrangement of cooperating rollers is created, which is pivotable in the second area without the position relative to each being hampered.

Enclosures:

Claims, replacement pages 33 to 36  
Specification, replacement pages 1 and 2  
each in the version of 07/28/2005  
in triplicate
